

STAINLESS STEEL SLIDES... SUPREMELY FUN, SUPREMELY DURABLE

There are many reasons why Blue Imp leads the industry in stainless steel slides, but at the end of the slide, it comes down to this: nothing beats stainless steel for long-lasting performance that's super fast and super fun!

Here are a few reasons why municipalities across Canada are now requiring stainless steel slides on all future playgrounds:

- highly durable: supported by Blue Imp's no-nonsense 20-year warranty
- vandal-resistant: not flammable and less prone to graffiti than other materials
- low-maintenance: due to their durability and vandal-resistance, stainless steel slides require little to no maintenance
- cochlear-implant friendly: stainless steel slides do not create the static electricity that can damage cochlear implants worn by children with hearing impairments
- eco-friendly: steel's long life cycle makes it a greener choice than other options; in addition, steel is the most recycled material on earth and is easy to recycle in most communities
